

All football players are divided into 11 unique positions in which they can perform (one or more). These are defenders, center backs, laterals, wingers, etc.

You can check the position of football players [here](#)

Each round you will choose a module for the game, a lineup of 11 main players and a bench. (although many managers play with one module all season). All our modules are in the picture. During the auction, the system will also tell you which schemes best suit your set of players.

You can find all modules [here](#)

Each round takes place according to the Head to Head system, that is, in each round you will face one of the seven opposing managers. You just need to choose a team that will play better than him.

According to the results of real matches, players are awarded not only bonuses and penalties for their actions, but also a Base rating. This is a point that is assigned to a player, a third-party statistical resource, depending on his actions in a real match.

We use it as such a resource <https://www.fotmob.com/>

Twelfth Yard		<b>1</b>   <b>3</b>		MFC Mykolaiv
		78.3   88.4		
Green City Ultras		<b>3</b>   <b>3</b>		Lemberg Worms
		90.0   89.3		
Batyari		<b>4</b>   <b>3</b>		The Mayak
		93.0   90.2		
Olegendary		<b>3</b>   <b>1</b>		Angels
		91.0   74.2		

If the player did not play in the real Tour, he can be replaced by someone from the bench who can play in that position or play in it with a penalty. The basic scores of the main players, as well as penalties and bonuses, are added up and converted into game goals according to the principle "72 points - 1 goal. Each subsequent goal is for an additional 7 points"

The team that scored more goals in the match wins it. 3 points are awarded for a win, 1 for a draw. The tournament table is formed on the basis of these points

## *And why should I play this and not just FPL?*

- Small leagues (8 managers each). These are real people from the members' chat, not unknown people from the other side of the world. You can discuss the results with them, talk about defeats, etc.
- In Mantri, every footballer is unique and plays in the team of only one manager of the league (no more Salah in 95% of teams). Moreover, you form teams not according to the principle of a draft, but in the format of an auction - Holland will not be won by the one who has the first pick, but by the one who pays the most.
- H2H (head to head) system. In each round it is necessary to beat only one opponent. This creates maximum intrigue until the end of the season. Of the 12 EPL leagues we played last season, in more than half the champion was decided only in the last round
- In addition to points for effective actions, the player's rating from the Fotmob resource (similar to Whoscored) is also taken into account. It's possible to win a round even when your players haven't scored a single goal.
- No paired or incomplete tours. The tour will not close until all 10 matches have been played. The manager should not suffer because his team has many FA Cup or league finalists.
- Players play in their real positions, which are 11. No more midfielders Martinelli, Sons, etc., and 3 laterals in defense. The Mantra team looks like a real football team, not a symbolic FIFA team with Maradona on CDM. And in the team, players of all positions (and goalkeepers, defenders, etc.) are important.
- Tournament motivation - the winner of each league receives a customized cup. Moreover, you will fight not only for the championship, but also for the preservation of registration or promotion, because in Mantra there is a certain system of leagues, so conditionally, even if you lose the chances for the championship, the tournament motivation remains.
